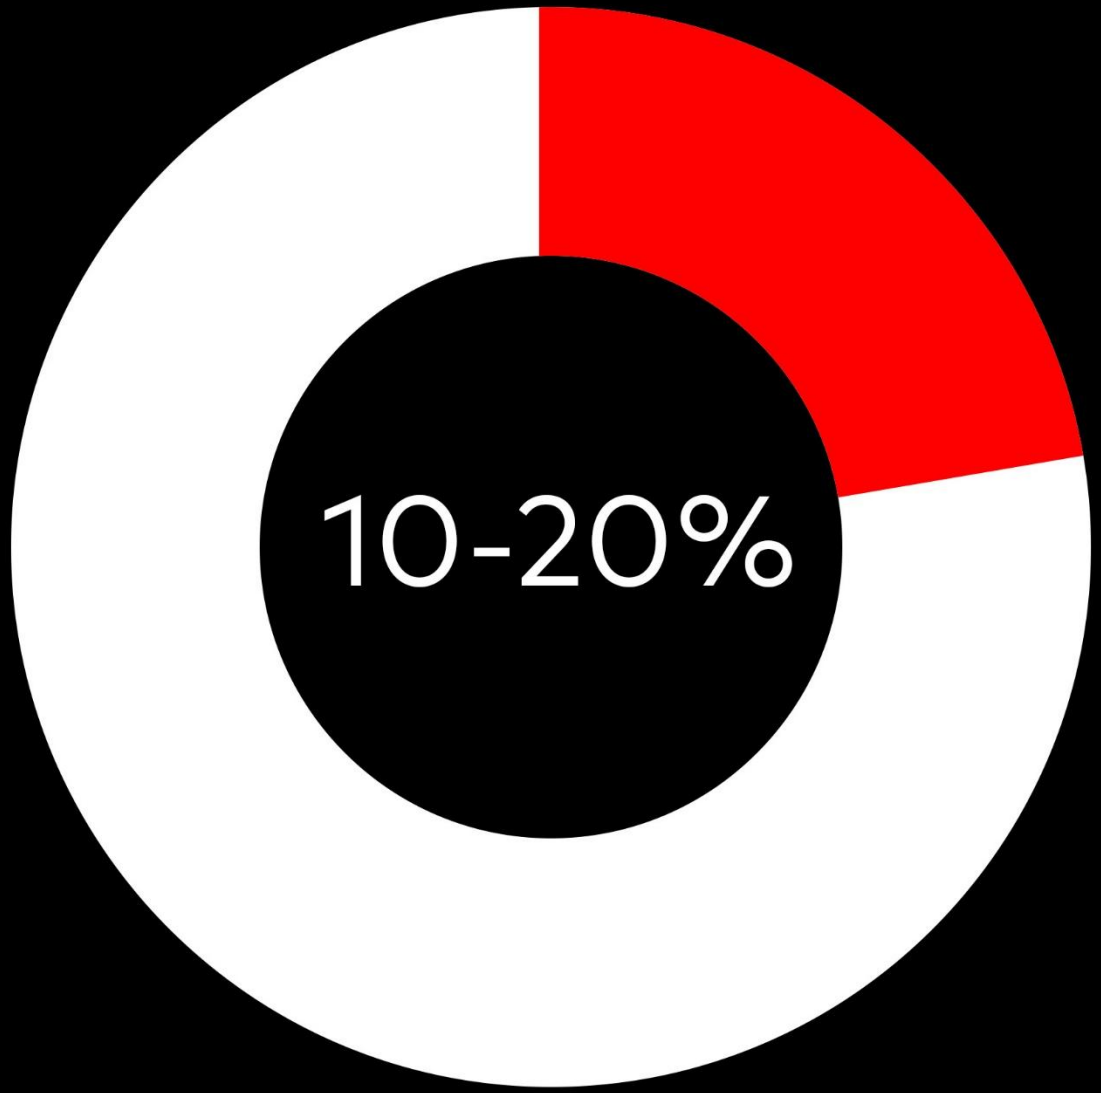
BIMSynch

Synchronised Architecture

Unexpected costs



The problem

Human mistakes in construction are inevitable

The problem

Incompatibility
of
plans

BIMSynch
Synchronised Architecture

A digital platform that saves customers **time** and **money**:

- By optimizing construction costs;
- By improving the assembly processes of MEP;
- By improving the author monitoring processes;
- By improving construction monitoring processes;
- By improving the quality of real estate management work.

Unexpected costs

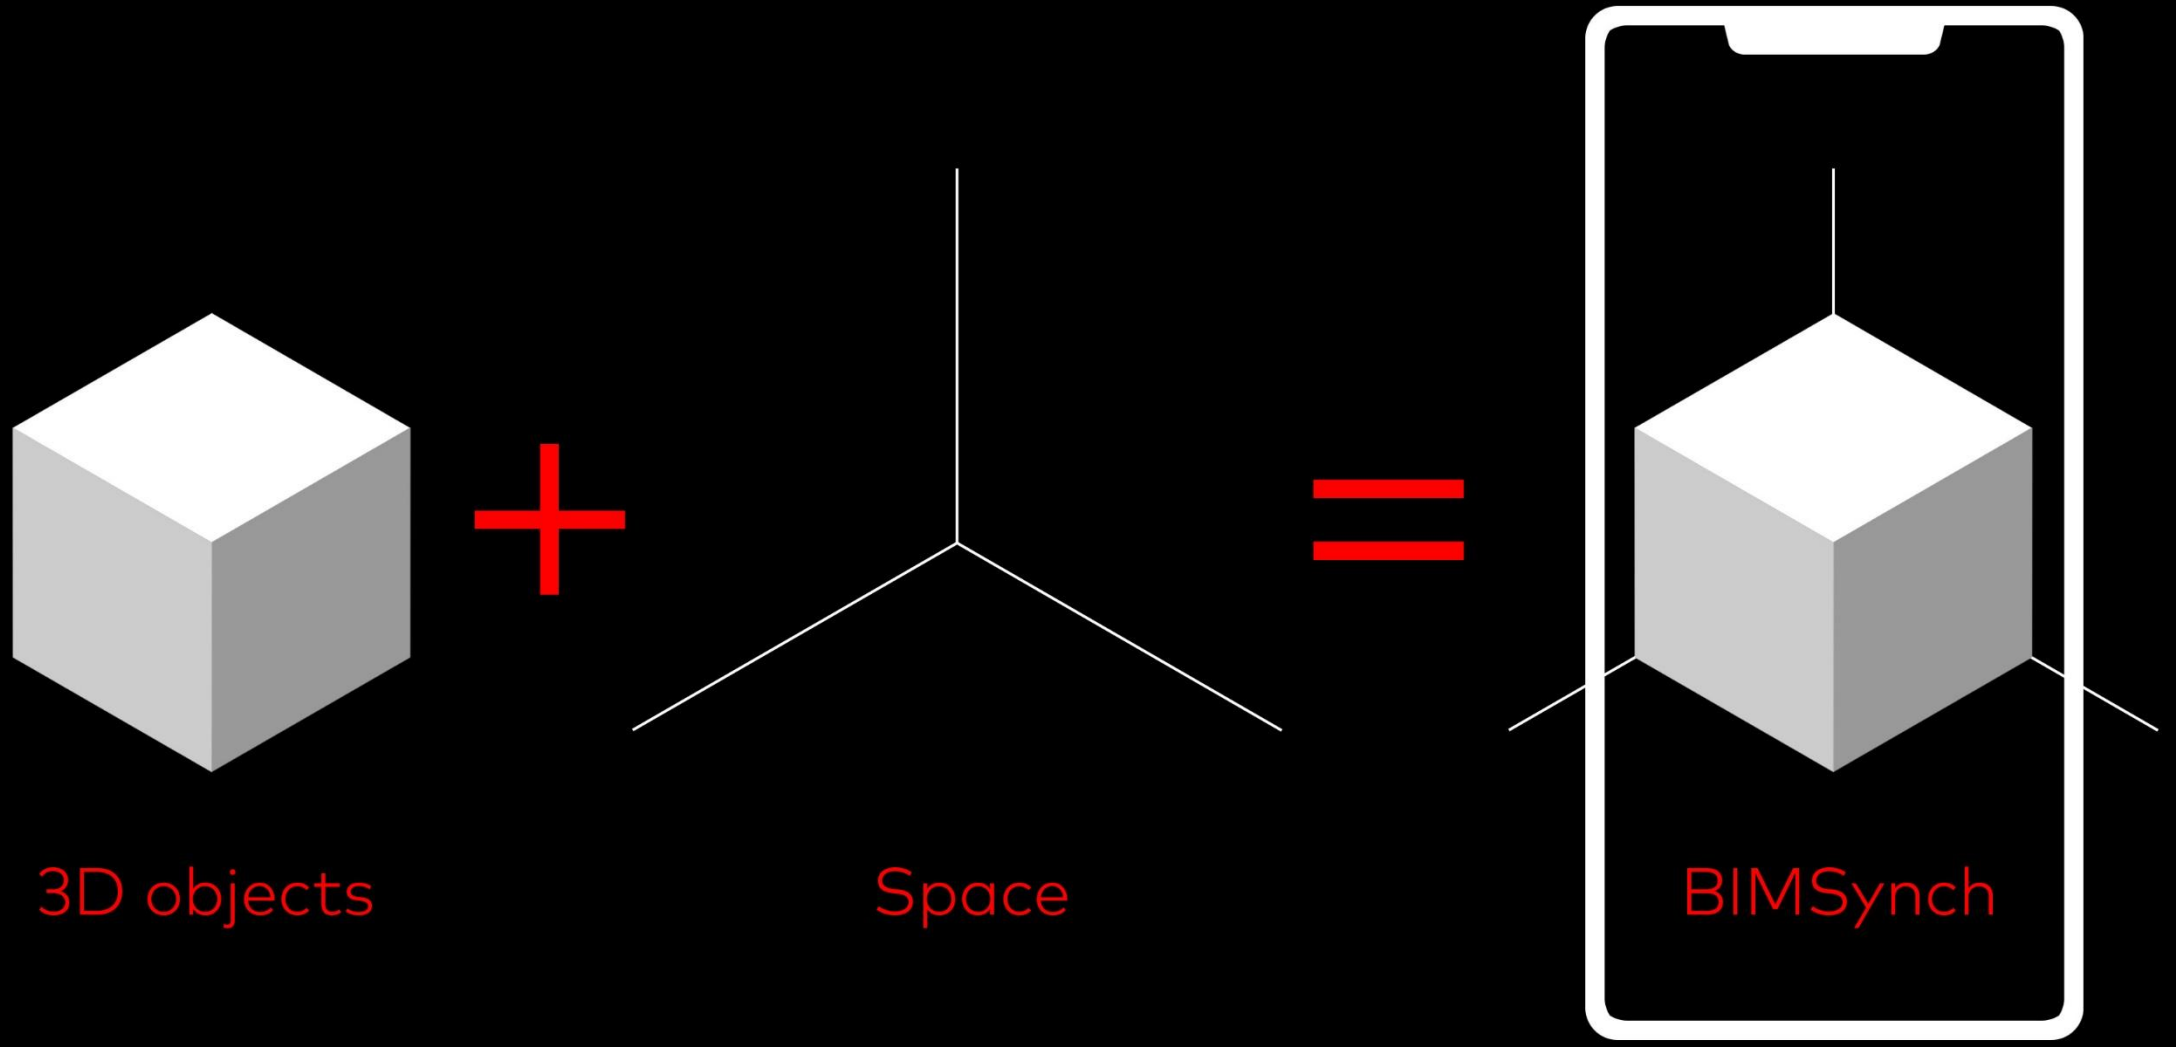
Augmented Reality Synchronisation

New generation smart tool



View building design projects in real time and in real place - using a mobile application.

BIMSynch
Synchronised Architecture

Customer industries:

- Architecture;
- Construction;
- Engineering communications (MEP);
- Construction supervision;
- Real estate maintenance.
