# HOW IT WORKS?

# WHERE DO WE START?

Our company is located in Baltics and we will start from our domestic market investments. The economy in the Baltic states has been among the fastest growing in the European Area. Estonian Real Estate market is developing in fast pace, while offering great rental yield. Currently we already have projects in Estonia and Latvia, by the end of 2019 we are looking to cover all 3 Baltic capital city's.

Next step will be launching investment projects in new areas. This will making our portfolio more secured and attractive for our potential investors.
